

Artificial

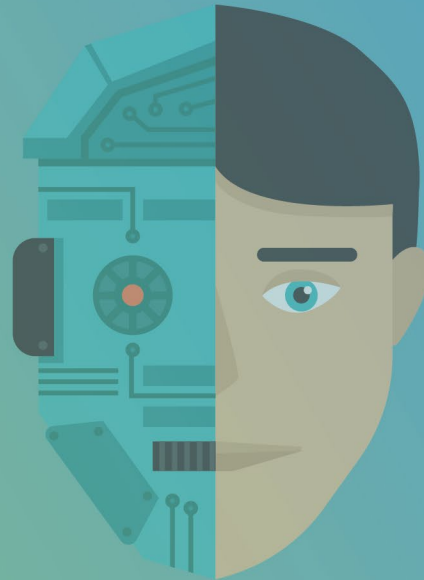

Intelligence

What Is Artificial intelligence ?

What Is Intelligence ?

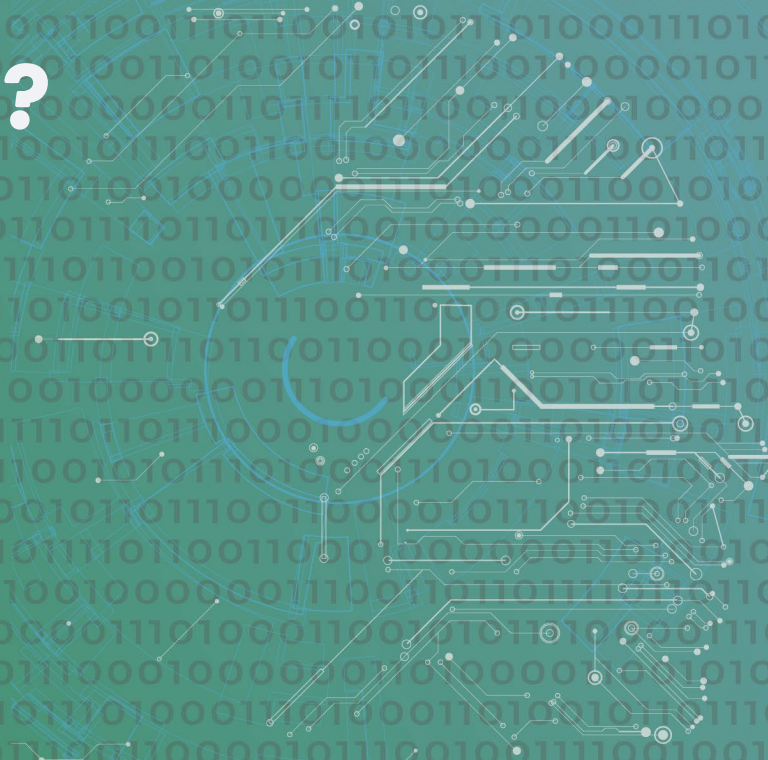

- **Analyze**
- **Planning**
- **Problem Solving**
- **Decision Making**
- **Picking Up Languages**

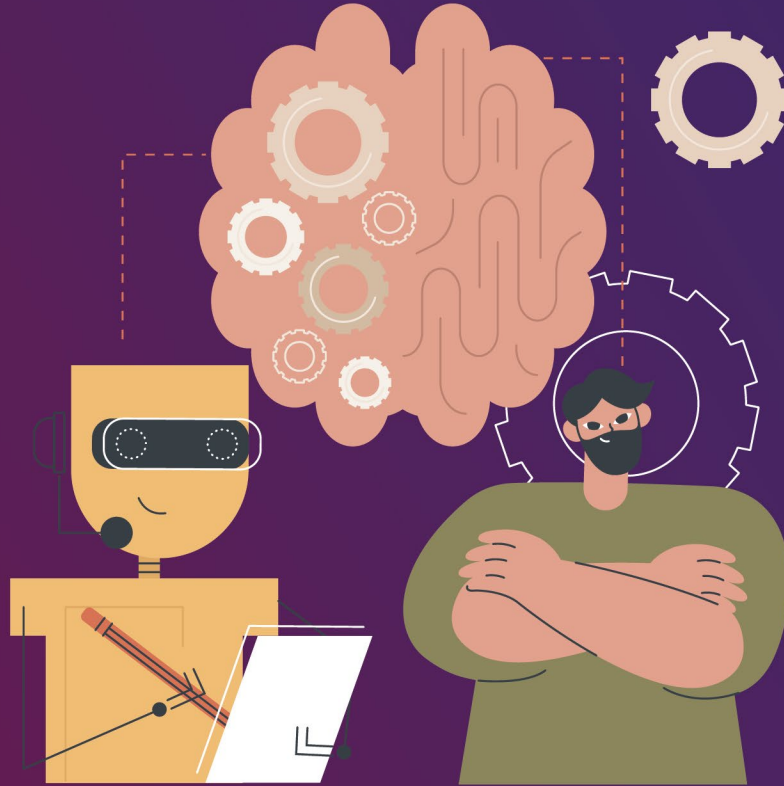

Before We Start :

What Is Algorithm ?

What Is Problem ?

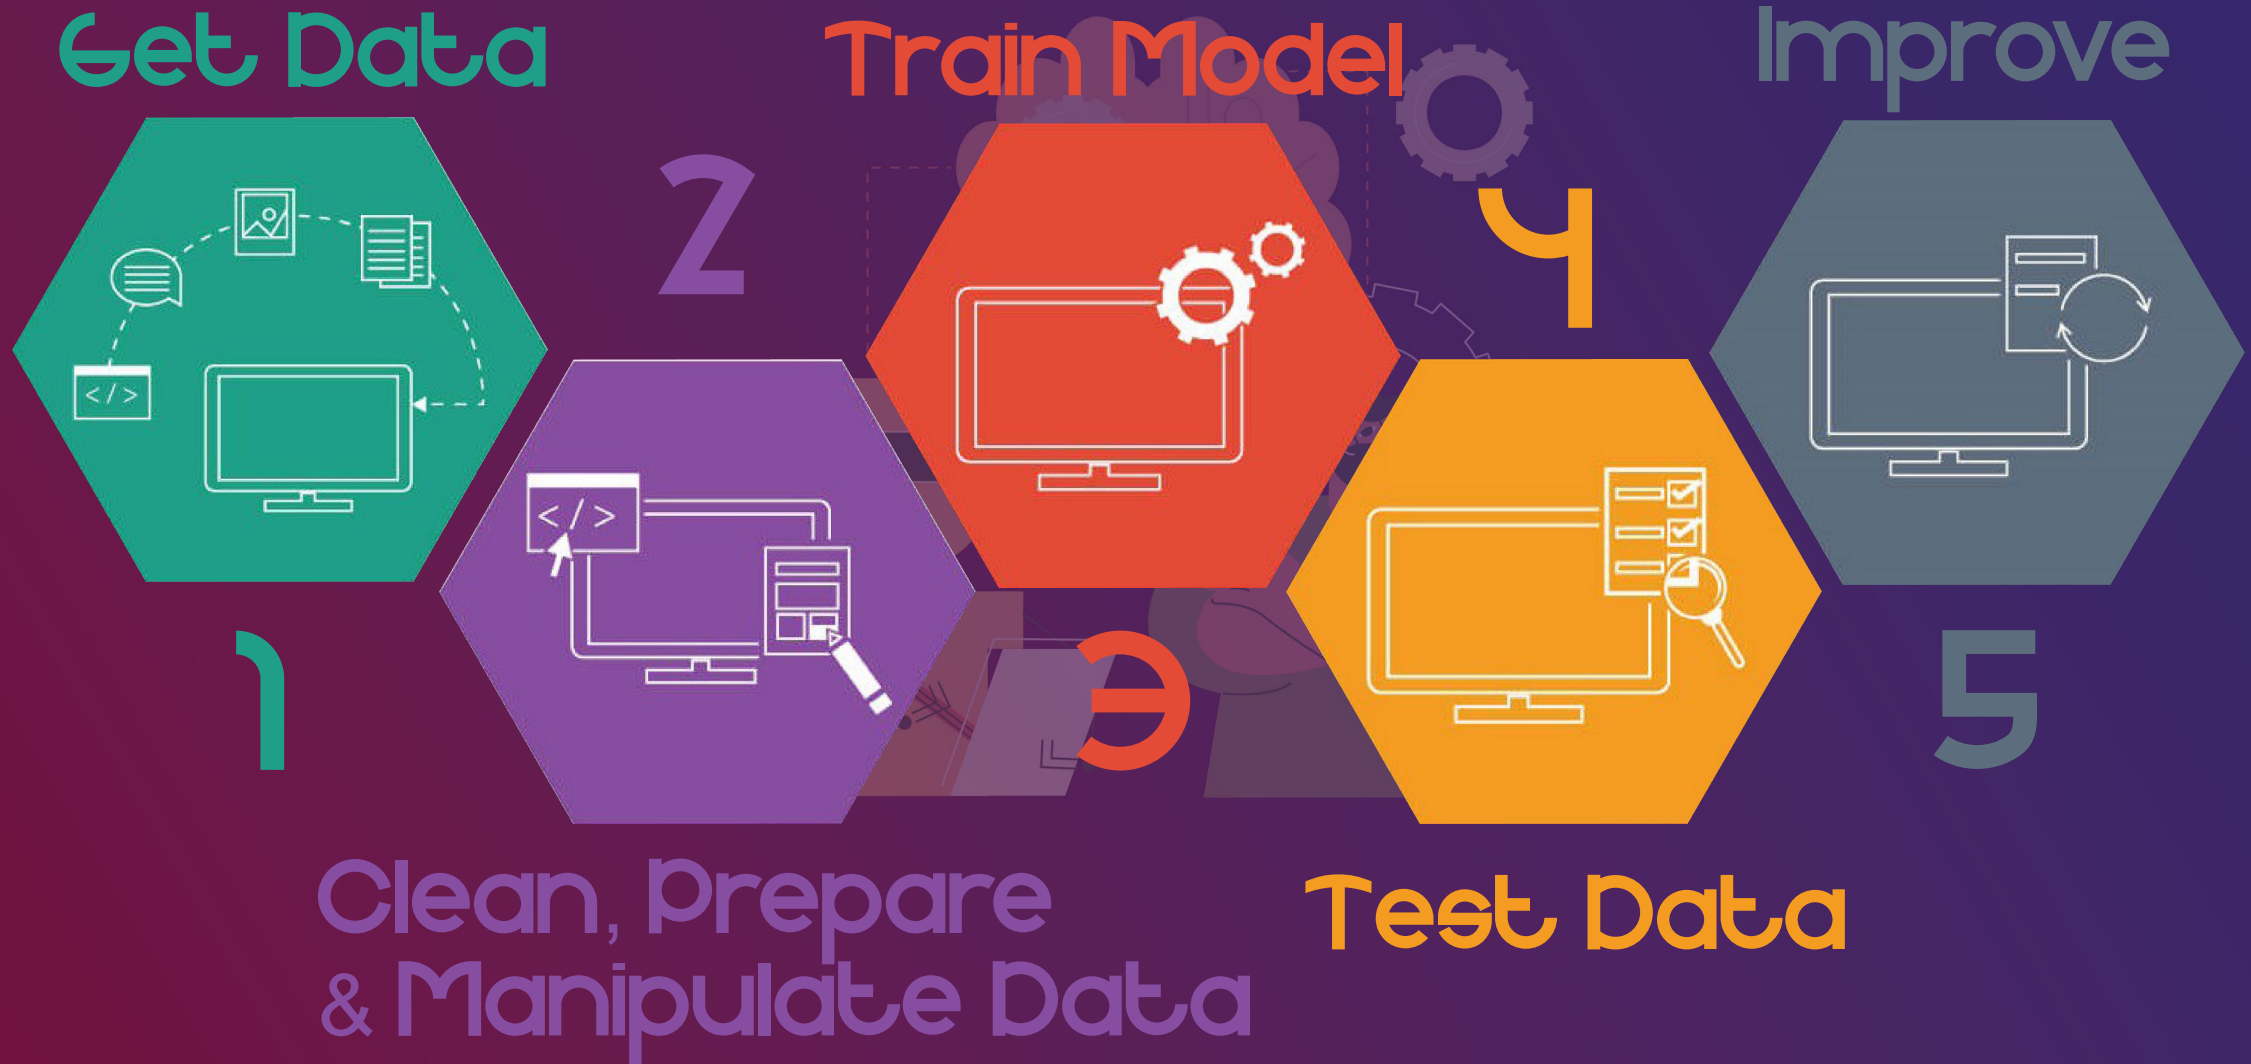

Machine

Learning

What Is Machine Learning (ML) ?

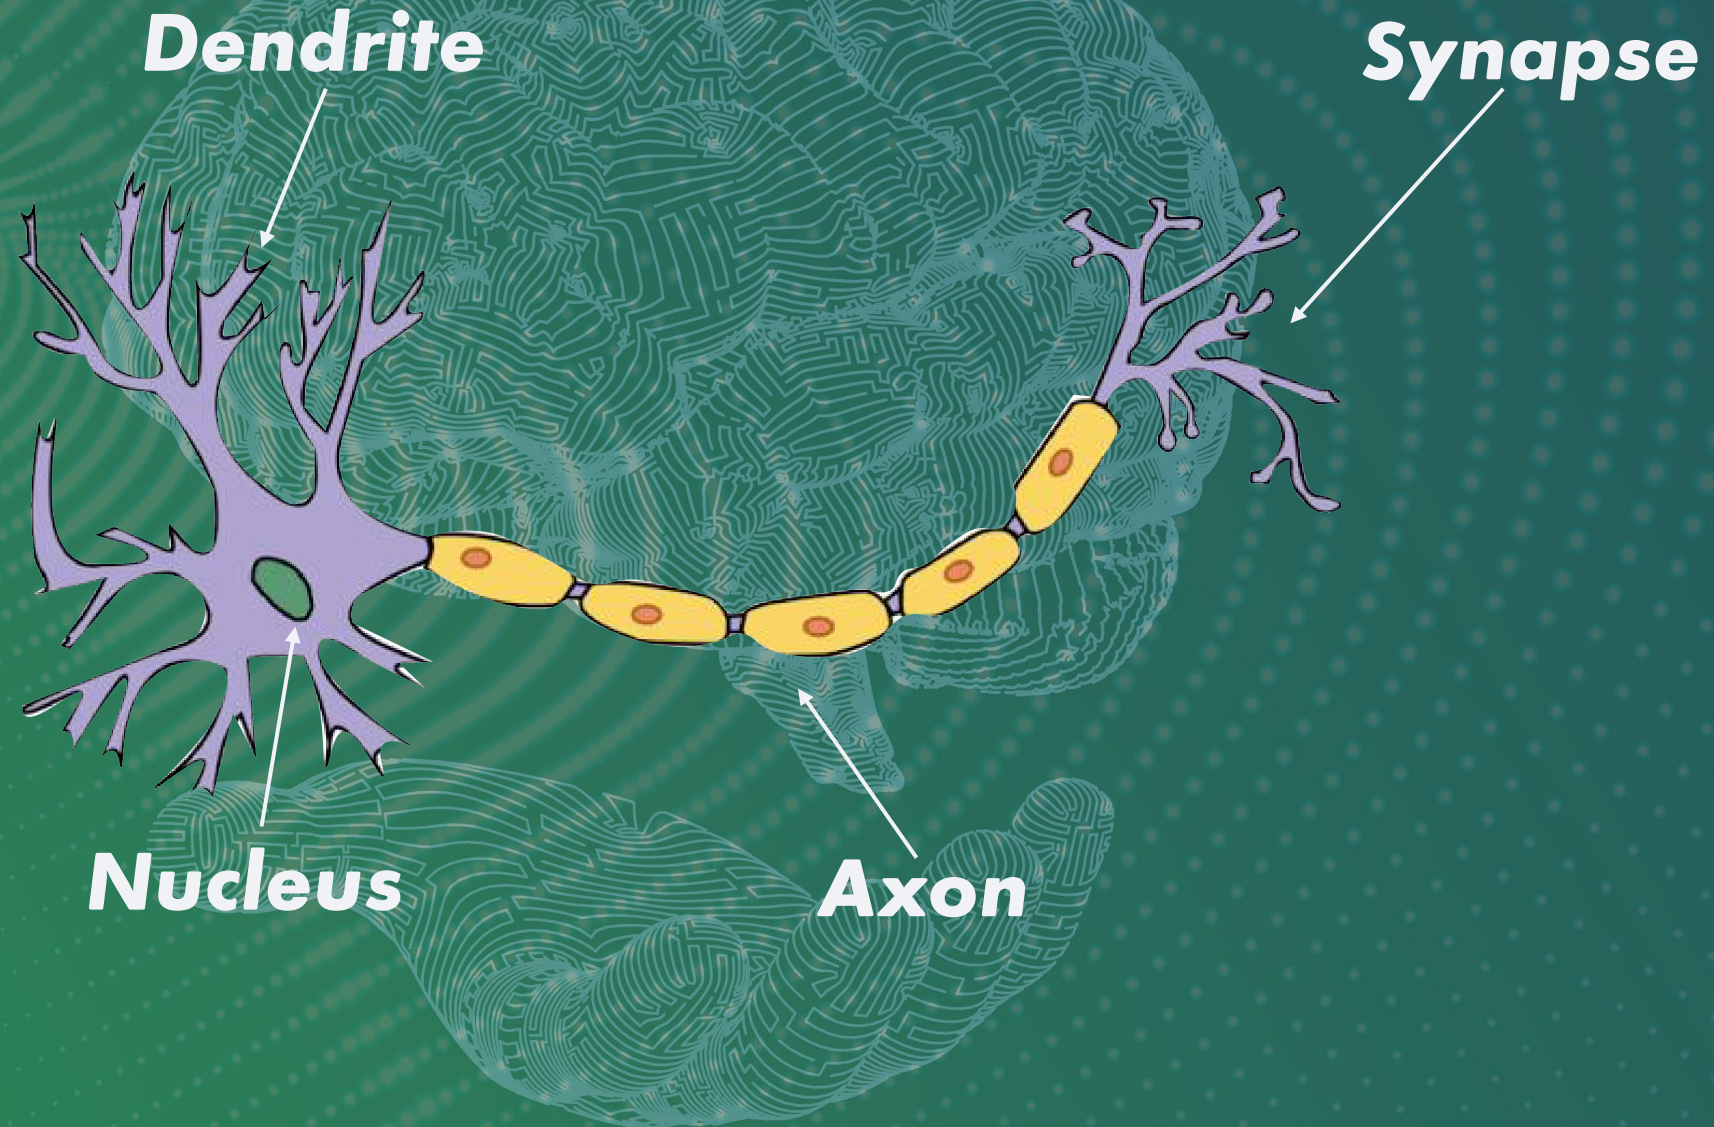

Neural

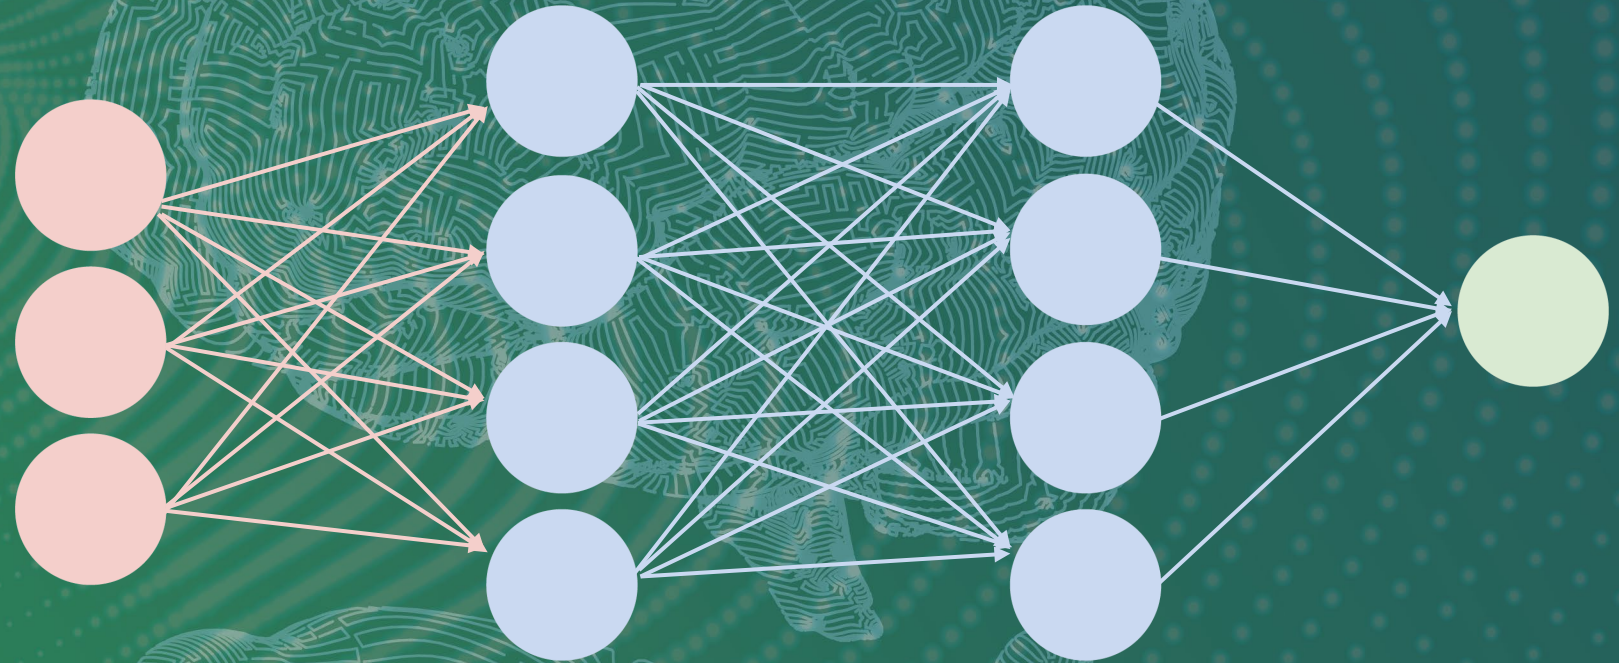

Network

What Is Neural Network (NN)?

How It Works ?

Input Layer **Hidden Layer 1** **Hidden Layer 2** **Output Layer**

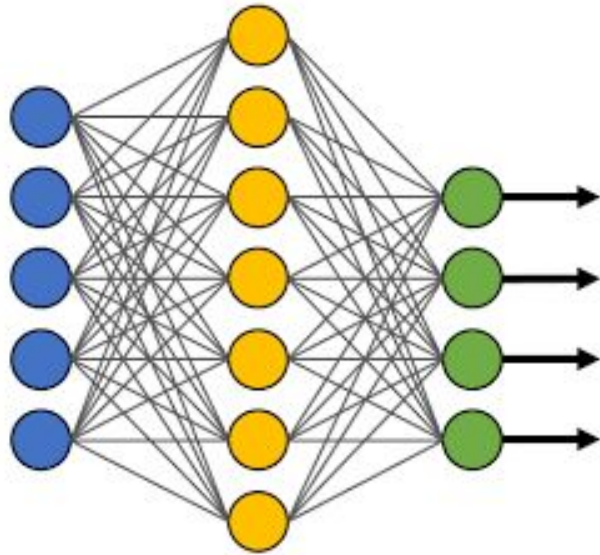

Deep

Learning

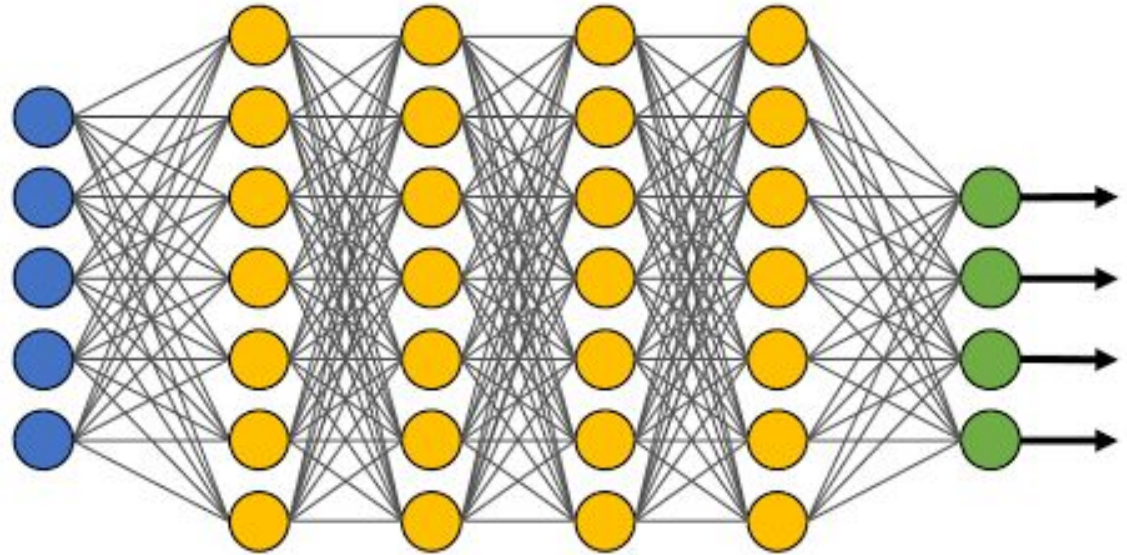

What Is Deep Learning (DL)?

Simple Neural Network

● Input Layer

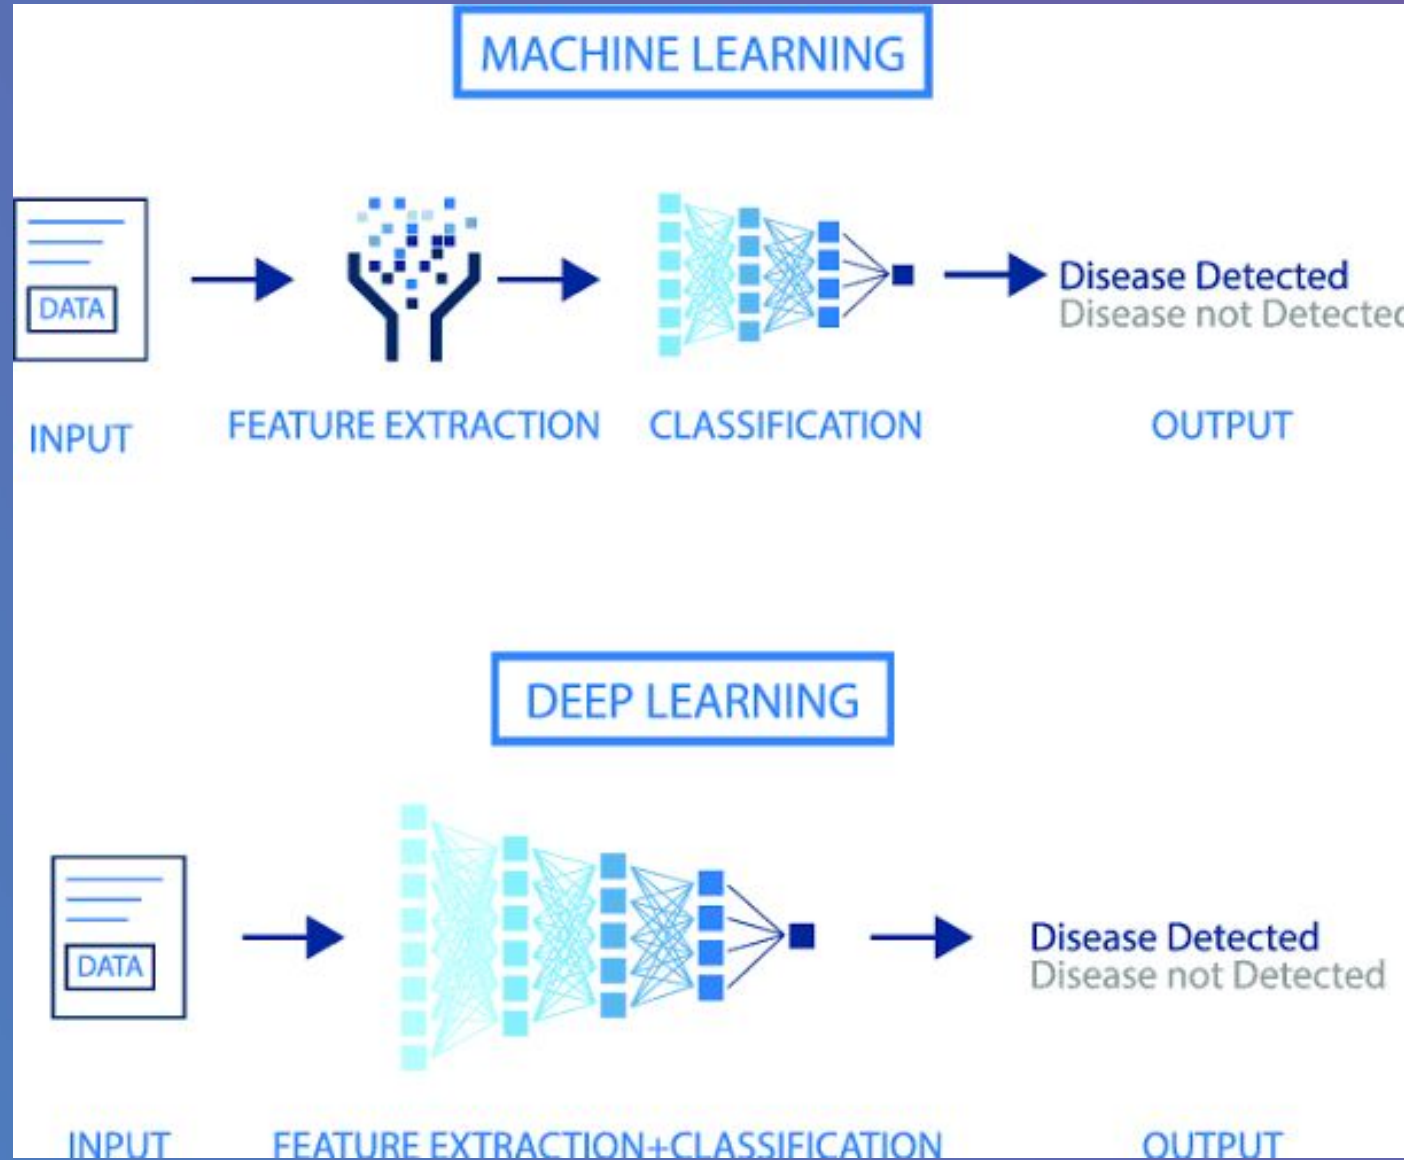

Deep Learning Neural Network

● Hidden Layer

● Output Layer

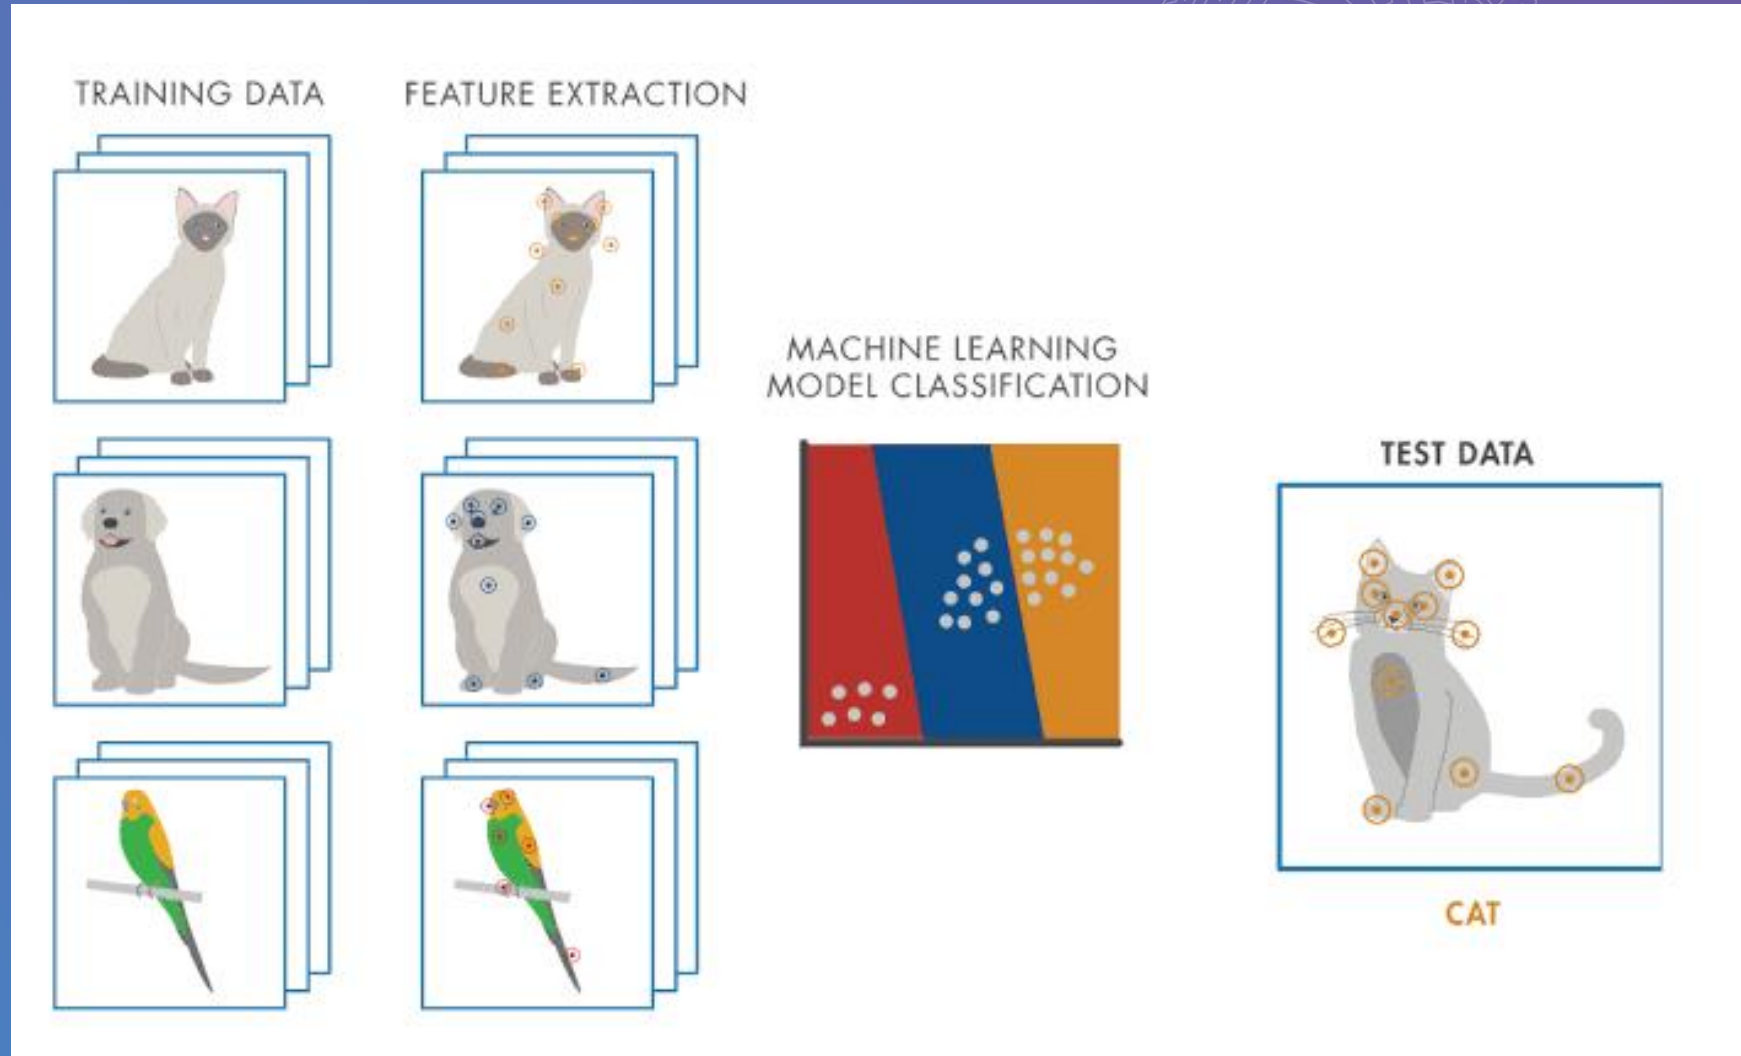

Diff Between DL And ML :

AI Projects

Features Extraction

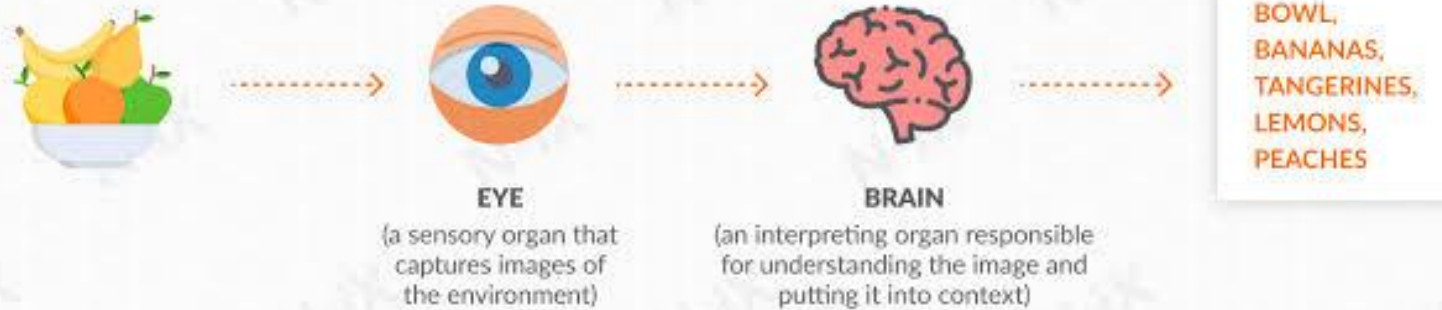

Computer Vision

Human vision vs computer vision

N-iX

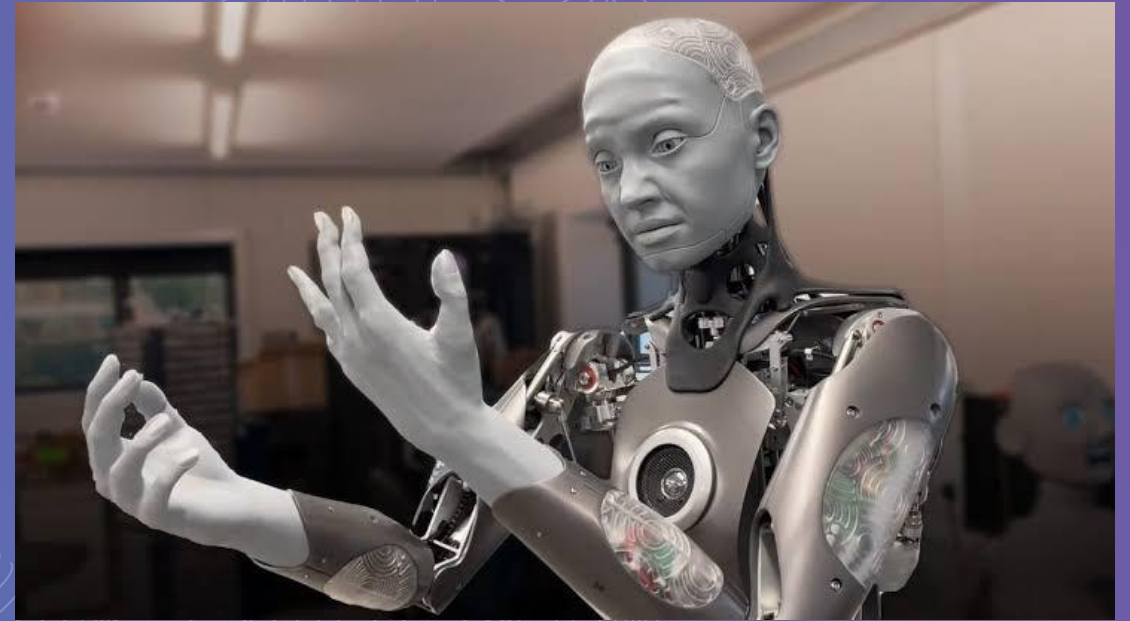

Human vision system

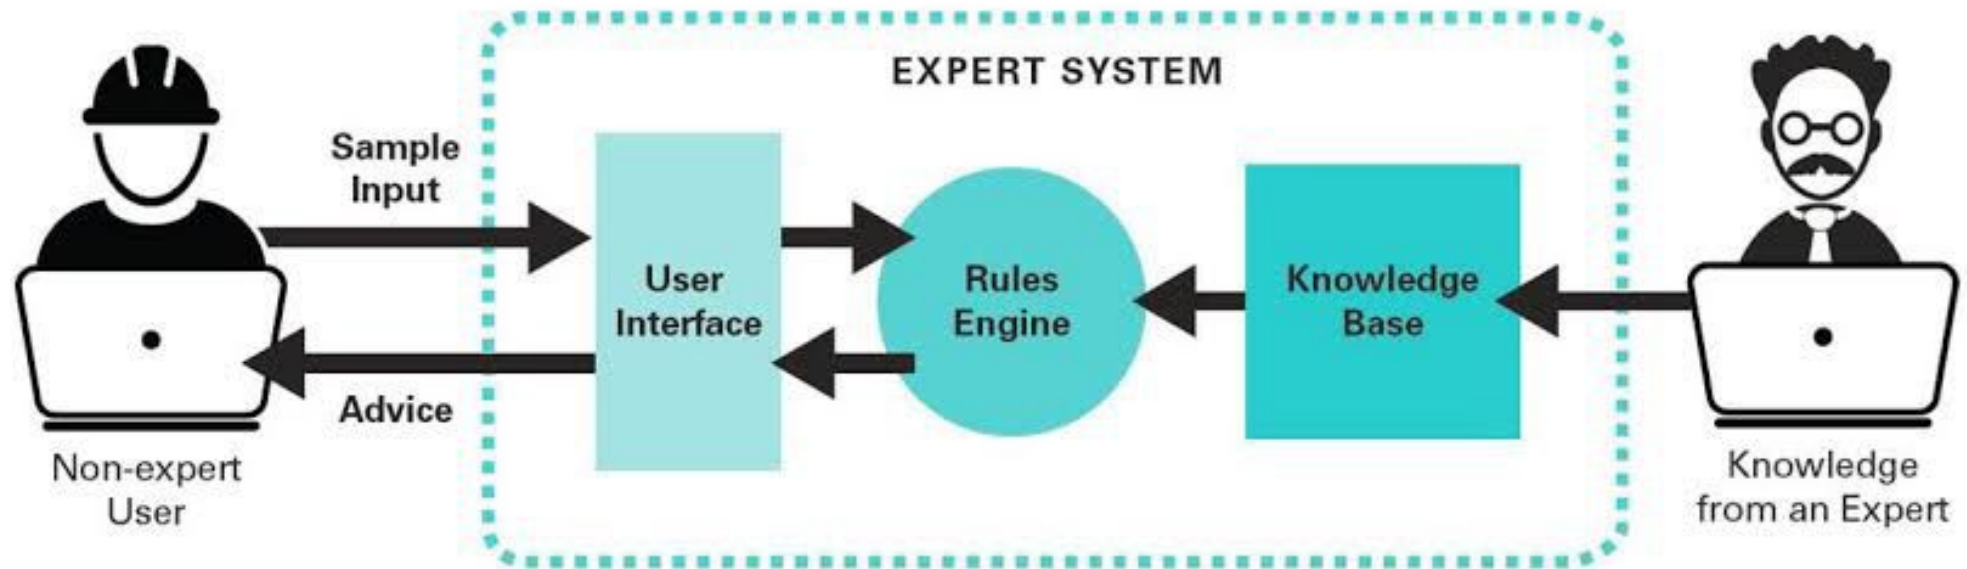

Computer vision system

Intelligent Robots

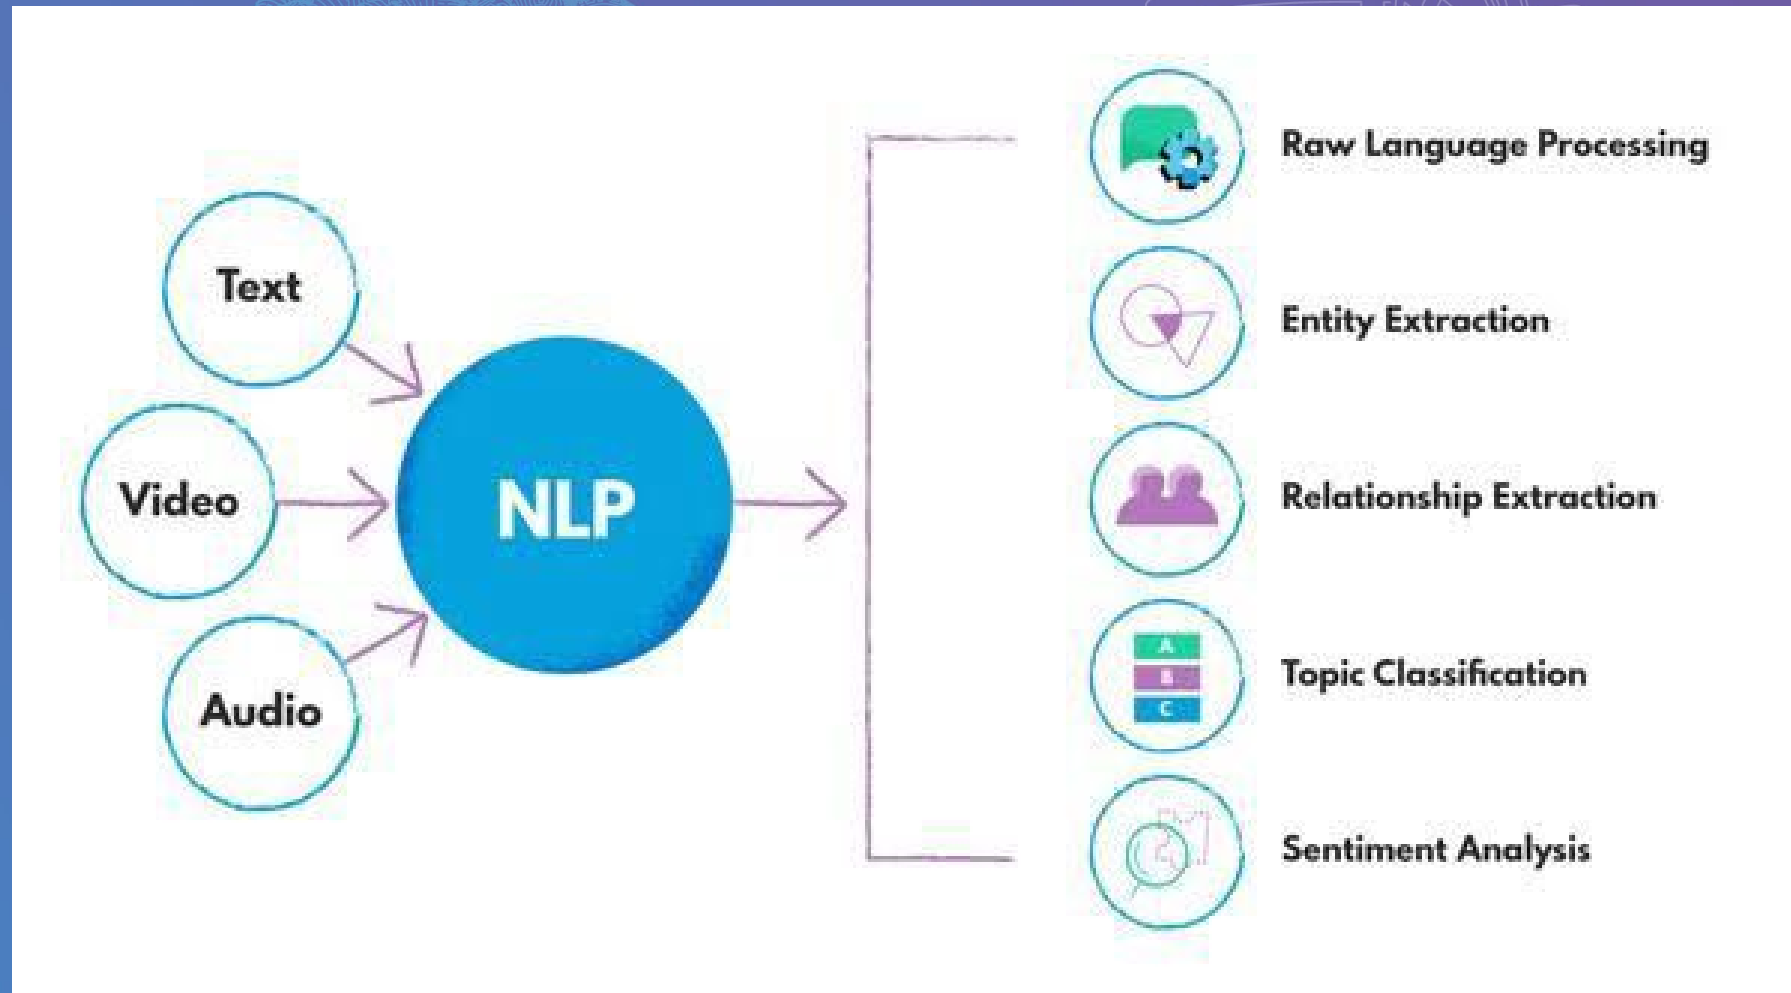

Expert System

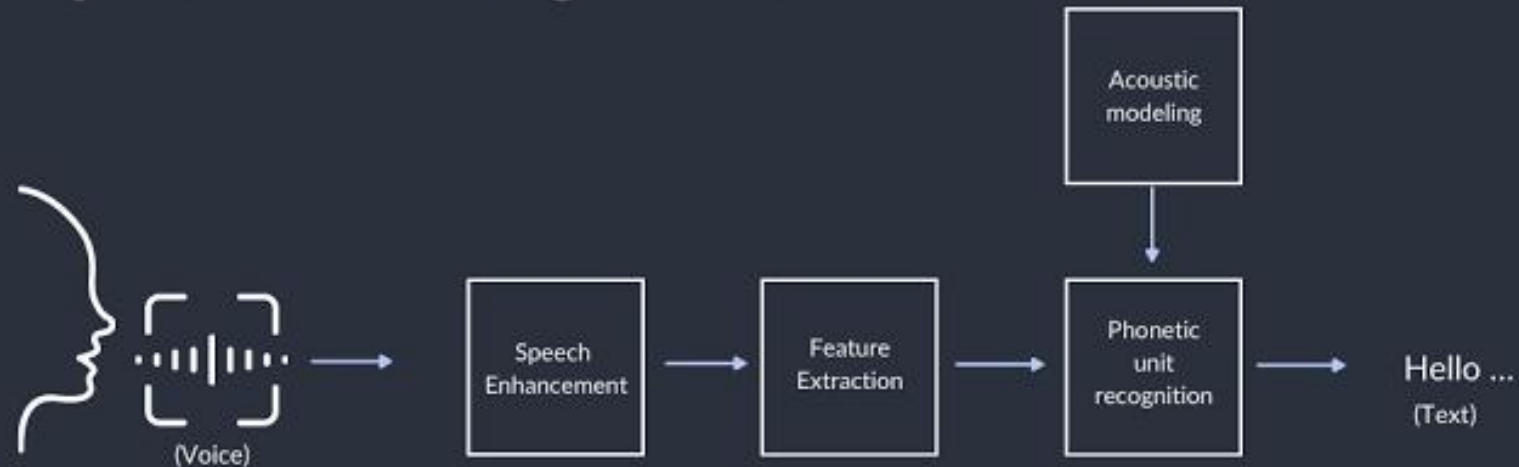

The user inputs information about: the equipment, the component and the oil being tested . . . The Expert System does the rest.

Natural Language Processing (NLP)

Speech Recognition

Speech Recognition

Thank You
