THE FUTURE OF EDUCATION

The Education Time Journey

Past, Present and Future

BrainUp

The Education Time Journey

01 Past

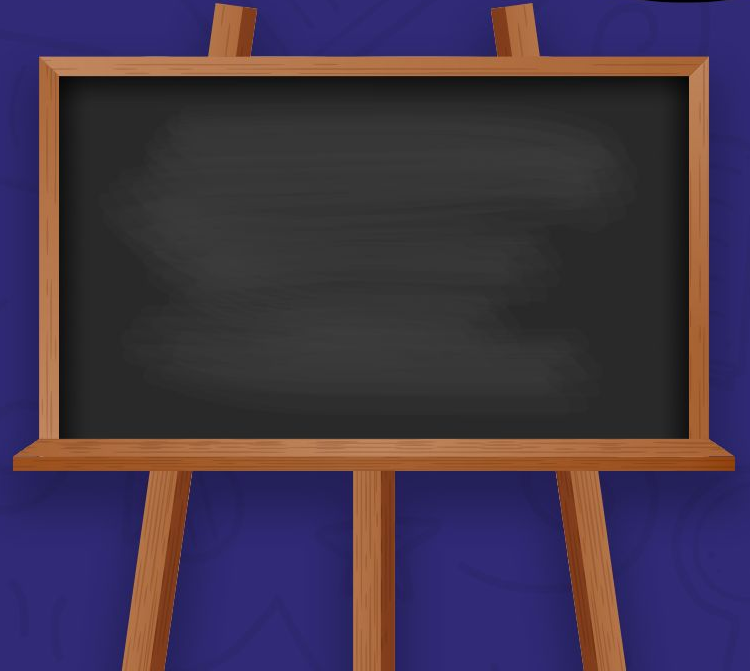

02 Present

03 Future

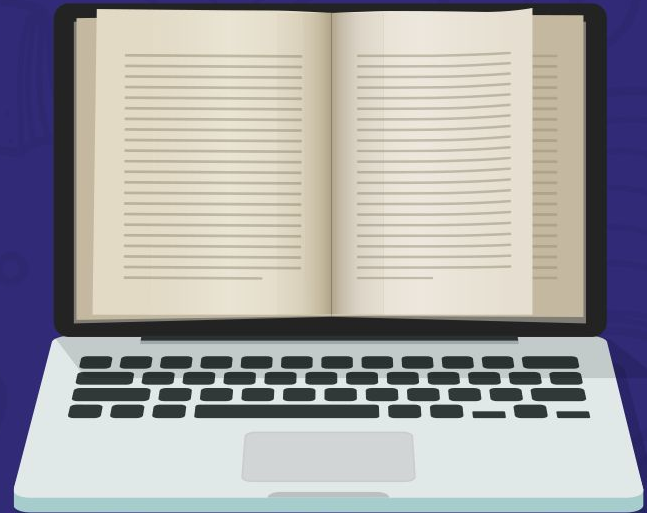

01 Past

- **Education in the past was very different**
- **Chalkboards, traditional classrooms**

02 Present

- Nowadays, education is rapidly evolving
- smartboards, electronic books and online resources

**The Education
Time Journey**

The Future of Education

BrainUp's Vision

A | Create a comprehensive
and user-friendly
educational platform

B | Making online learning
easier and more accessible

Enhancing Communication

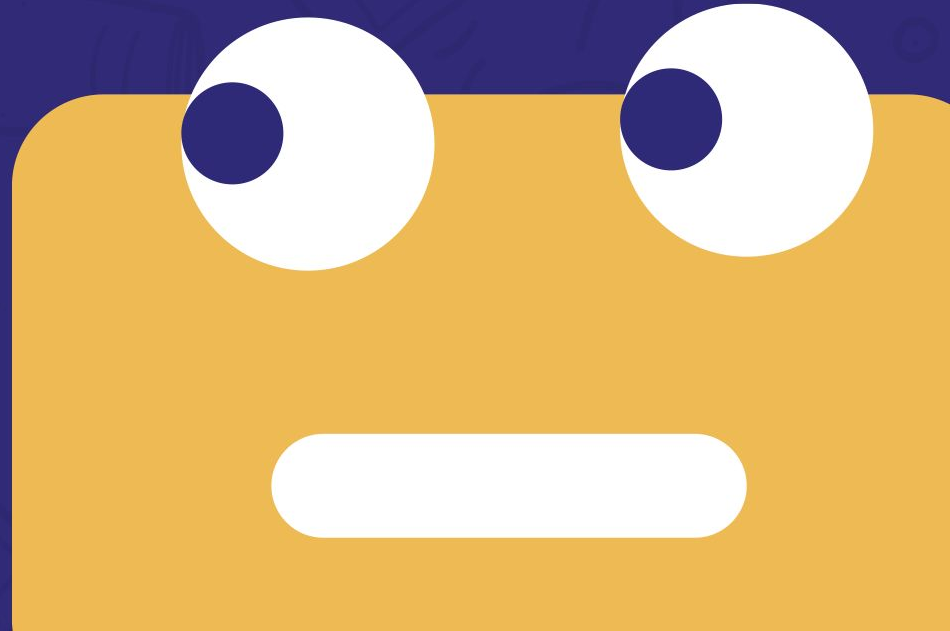

- A** | Target Audience
The teaching community
- B** | facilitates communication
between teachers and students
- C** | Resources ,materials
and quizzes

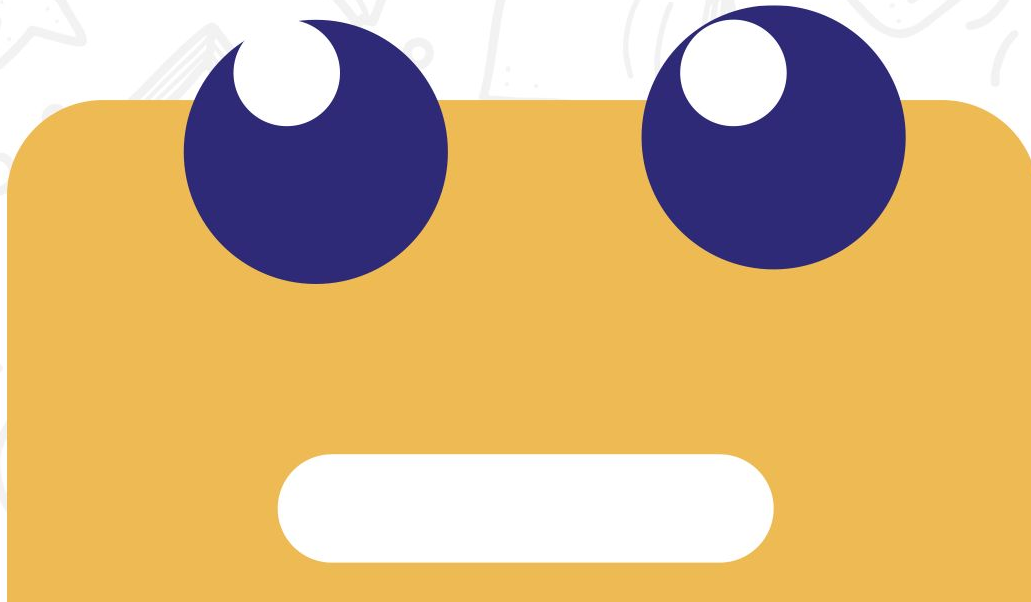

Market Analysis AI integration

Other Platforms are not using AI
So, we used AI to help

- A** | teachers in creating quizzes
- B** | students in research through the AI assistant

UI Design

The Main points we focused on in our design

01

Intuitive
and Clear Design

02

Clean Design with
a minimalistic
approach

03

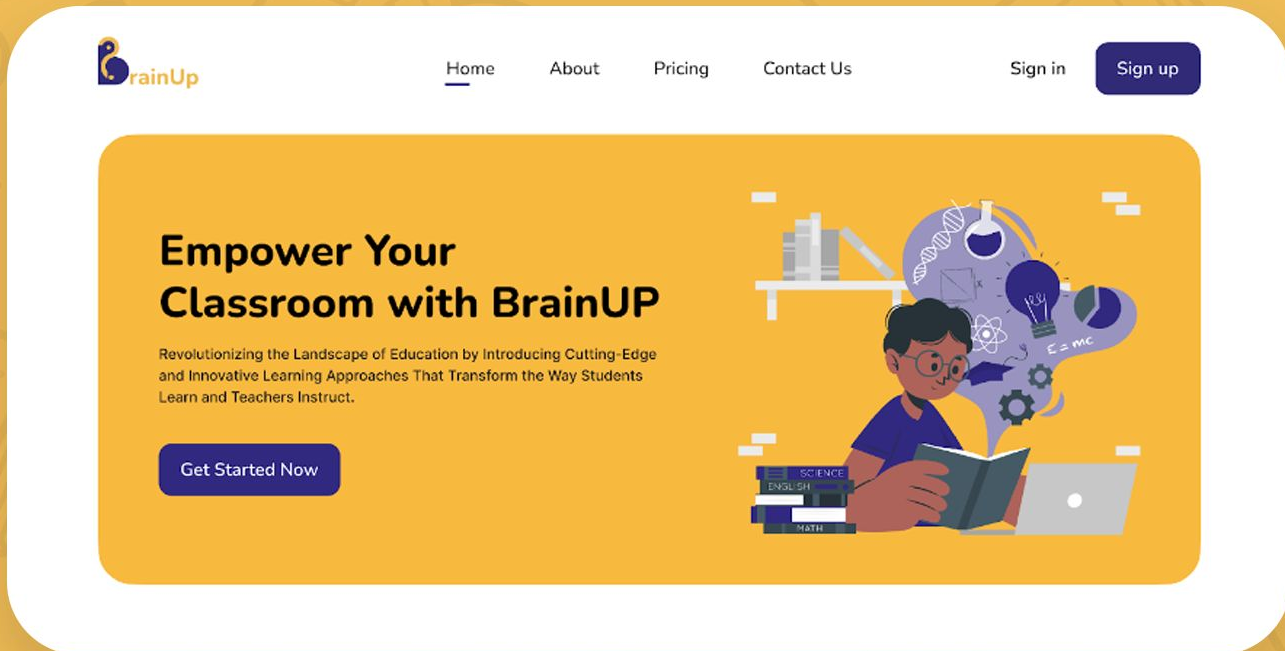

Visual
consistency

04

Improving
Student
Engagement

01

Intuitive and Clear Design

02 | Clean Design with a minimalistic approach

Mobile App Development

C | Testing

Backend Development using Laravel

Backend Development using Laravel

A | Controllers and Models

01

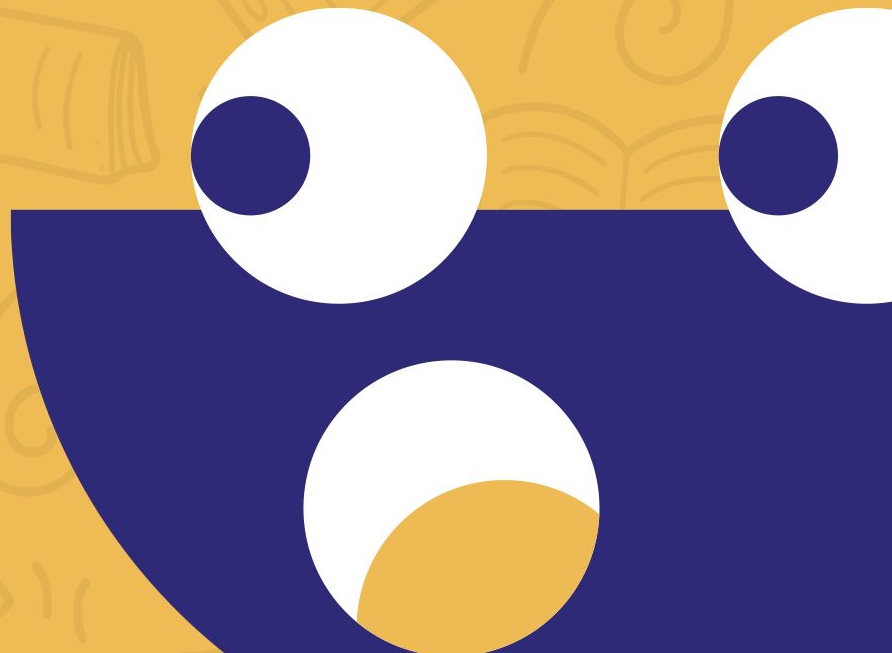

MVC Desing Pattern

02

Controllers
the intermediaries between
the user interface and the
application's logic

03

Models
the model layer defines how the
data is structured and how it can be
accessed or modified

Backend Development using Laravel

B | About Migrations

01

Database Structure Management
Migrations are used to create and manage the database structure

02

Seamless Updates
With migrations, we can seamlessly update the database schema as the application evolves

Backend Development using Laravel

C | Using Api
Routes & Authorization

02
Authentication
and Authorization

01
API Routes

03
Token-based
Authentication

Backend Development using Laravel

D | Documentation of Api & Test cases

01

API Documentation

Postman is our primary hub for API documentation created specifically .to frontend and mobile developers

02

Testing with Postman

Frontend and mobile developers can use Postman to validate the functionality of the API endpoints

Backend Development using Laravel

E | Mailable class
for Sending Emails

01 Customized and Personalized Emails

02 Seamless Integration

03 Confirm Email ,Forget password
Welcome Email ,Notifications and etc

Our Management Tools

| FeedBack

To ensure users centred development we gathered feedback from different users either school teachers or college professors to see what features are missing and we found the following Ideas

Future Development and user's feedback

Dr. Mohammed Showman
